

eLegalisation

eLegalisation From the week of September 1, 2020, the Belgian Embassy in Yaoundé is launching the eLegalization program. Concretely : foreign documents intended for Belgium will be legalized electronically, there will be no more stickers on paper documents.

Foreign documents destined for a country other than Belgium can be legalized electronically AND using a sticker on the paper document.

The link to the legalized document will be emailed directly to the applicant and the applicant will also receive a receipt to keep.

In the email and on the receipt will be mentioned a file number and a date of issue (known as the "closing date"). The electronic legalization can be viewed and downloaded via the site <https://legalweb.diplomatie.be> using the file number AND the date of issue (closing date on the receipt).

This only concerns documents legalized directly at the Embassy counter and documents passing through TLScontact.
